Water Levels Matter!

Coalition for Equitable Water Flow

Summer 2018

Open Letter to: Candidates in the 2018 Municipal Elections for: Algonquin Highlands; Dysart et al; Havelock-Belmont-Methuen; Highlands East; Minden Hills; North Kawartha; and Trent Lakes.

Issues facing Voters in the Upper Trent River Watershed as Identified by the Coalition for Equitable Water Flow

The Coalition believes there is an opportunity for municipalities to take further action and to demonstrate continuing support on a range of water management issues. As a candidate for municipal office you are invited to respond to the following questions so that we can advise our membership with regard to your position, and your personal commitment on these issues.

Questions to Candidates from the Coalition

1. Do you agree that municipalities have a role to play in working to improve water management in the Haliburton Sector of the Trent River watershed? If so, are you personally committed to continued municipal support for the *Upper Trent Water Management Partnership?* (see background information on next page).
2. What would you do to strengthen the flood control and mitigation provisions of your municipality's Official Plan? For example, would you support initiatives to provide better flood plain mapping and flood mitigation planning as the basis for decision-making?
3. Do you agree that municipal governments should work with local lake associations, the Trent Severn Waterway (TSW) and the Ministry of Natural Resources and Forestry (MNRF) to further improve water management operations on reservoir and flow-through lakes and the connecting rivers? For example, are you in favour of:
 - a. urging water conservation to support recreational use of the reservoir lakes; and
 - b. the acquisition of lake-specific data with regard to the location and depth of trout spawning beds to improve and protect fish habitat?

Please note that a summary of responses will be posted at www.cewf.ca starting in early September.

Ted Spence, Chair, Coalition for Equitable Water Flow
