

Glen Alda Seniors ... continued

ride in a sidecar nowadays. She derives much pleasure from that fortunately, as I enjoy her company on these rides.

March was a comfort food month for our little group. Pattie cooked up a storm to say the least. We could have fed an army with all the goodies she prepared, and so it was no wonder that many containers for that night's dinner left with the attendees. Nothing is wasted here. If there are leftovers, we ensure that all that is left from lunch finds a home. Laureen and Colin brought all the makings from their winter residence along Lake Ontario for the second meal of the month in Glen Alda. Laureen never fails to put together a scrumptious meal, and this time was no exception. Besides feeding us well it was a pleasure to see them once more after missing their company this long dreary winter. Thanks go out to both of our hosts this past month.

April is about spring, and two spring-like personalities in the forms of Katherine and Wendy are preparing the first meal of the month. I am personally looking forward to this as I know these two ladies can cook up a storm. Unfortunately, I do not know what is on the menu as I write this, but can hardly wait to sample it. Penny is slated to do the honours for our second gathering in April, and we all know from past experience that we are in for a treat. This lady has recently traveled to both Egypt and China so I am hoping she is planning something of a foreign nature.

Some of you out there think we are a dinner's club sort of thing. That is basically how this group was initially formed many years ago. Today, it is more about meeting and spending time with people with common interests with whom you have formed a friendship, which is why we always finish up this column with the friendly, active and open group quote. If you are interesting in sampling out hospitality then contact our President Barry at 705-656-1850.

Casey's PROPANE

If you are looking for a reliable fuel source this winter, please give us a call.

**We have 400 thousand gallons of propane,
